1 Q. Why not?

2 A. Well, a few reasons. Firstly, Google should have to
3 change. Google should make a privacy button that actually
4 works and honor its promises to its users.

5 And, secondly, as a class representative, it is my
6 responsibility to this class to maintain my same behaviors so
7 that our experts can do their work, and they've done a
8 phenomenal job at that, to be able to confirm what Google was,
9 indeed, collecting; and, finally, for legal reasons, to get
10 Google to change its practices.

11 Q. Did knowing that Google collected and saved your app
12 activity after the lawsuit, did it change how you used certain
13 apps?

14 A. I would say so, yeah.

15 Q. Tell me more about that.

16 A. Well, I was certainly more cautious with certain apps and
17 probably veered away from some altogether, maybe some of the
18 social media apps. So it definitely affected the number of
19 apps that I was using.

20 Q. Do you have an understanding, Mr. Santiago, one way or
21 another, that Google compromises the bandwidth or data on your
22 phone, as well as the battery life on the device, by taking
23 this SWAA data even when you have WAA off?

24 A. Yes, I'd imagine so.

25 MR. ATTANASIO: Objection. Foundation.
